Design for our future.

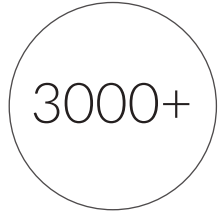

# About US

*Founded* in 1992, NABEL is a renowned global leader in the specialized manufacture of Sintered Stone and Porcelain Tile. We have been dedicated to creating a healthy and high-quality life, focusing on pioneering premium, eco-friendly material. We provide unique, practical, and sustainable solutions for both indoor and outdoor spaces. While consistently adhering to technical innovation and superior products, NABEL explores the strength of nature and art to offer customers a space experiences beyond expectations, leading the industry with continuous innovation.

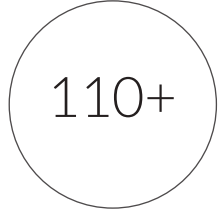

Currently, NABEL operates over 3,000 stores in more than 110 countries worldwide and nearly 10,000 partners, offering high-quality products and creating a wonderful life for our world together.

Specialising in the tile industry

Retail Stores

Number of exporting countries

# Environmental. Social. Governance.

In the tide of green development, NABEL stands as an industry pioneer, fulfilling its environmental promise with unwavering commitment.

## CERTIFICATIONS

### GREENGUARD CERTIFICATIONS

GREENGUARD, issued by UL Environment in the United States, is a globally recognized standard for low chemical emissions. It ensures that certified products have low emissions of formaldehyde, VOCs (Volatile Organic Compounds), and other harmful chemicals, contributing to healthier indoor environments. There are two levels of certification: GREENGUARD and the more stringent GREENGUARD Gold, which is designed for environments such as schools, healthcare facilities, and child-sensitive spaces where indoor air quality is critical.

### ENVIRONMENTAL PRODUCT DECLARATION(EPD)

EPD is an international green certification that quantifies and discloses the environmental impact of a product throughout its life cycle based on the international standard ISO 14025. Through EPD certification, NABEL clearly communicates the environmental performance of its products to customers, designers, architects, and government procurement entities, demonstrating its commitment to sustainable development. EPD is widely used in sustainable architecture, green procurement, and carbon footprint analysis, and are recognized by major green building rating systems like LEED and BREEAM.

### LOW-CARBON PRODUCT CERTIFICATION

The Low Carbon Product Certification is an authoritative environmental certification conducted by the China Quality Certification Center (CQC) based on national standards and relevant technical specifications. It aims to promote the reduction of greenhouse gas emissions throughout the entire lifecycle of products—including production, usage, and disposal—and to support green and low-carbon development. This certification involves the calculation and assessment of the product’s carbon footprint across its full lifecycle to confirm compliance with low-carbon emission requirements.

### GREEN BUILDING MATERIALS

The Green Building Materials Product Certification is a certification program carried out by authoritative bodies such as the China National Building Materials Test and Certification Group (CTC), based on national standards and technical specifications for green building material evaluation. It aims to promote the development of building materials that are green, environmentally friendly, safe, and high-performance. Through a comprehensive assessment of the product in terms of resource efficiency, environmental friendliness, health and comfort, and quality assurance, the certification confirms compliance with the standards for green building materials, supporting the green transformation and sustainable development of the construction industry.

### CHINA ENVIRONMENTAL LABELLING

The China Environmental Labelling Certification is a voluntary product certification program authorized by the Ministry of Ecology and Environment of China. It is carried out by accredited certification bodies, such as CEC, based on national environmental standards. Products that pass the certification are permitted to bear the China Environmental Labelling (also known as the “Ten-Ring” label), indicating that they outperform similar products in terms of environmental performance, such as resource conservation and pollution reduction.

### ISO9001 ISO14001 ISO45001

The certification of ISO 9001 Quality Management System, ISO 14001 Environmental Management System, and ISO 45001 Occupational Health and Safety Management System. This certification system standardizes a company’s management in the areas of quality, environment, and occupational health and safety, thereby enhancing its overall management level and market competitiveness. Obtaining the Three System Certification not only helps enterprises meet regulatory requirements and reduce operational risks, but also strengthens customer trust and promotes sustainable and healthy development.

# ENVIRONMENTAL. SOCIAL. GOVERNANCE.

## MISSION AND VALUE

Nabel adhering to the corporate mission of "creating a healthy and high-quality life", driven by the spirit of continuous innovation, makes unremitting efforts to improve people's living quality and create a green and healthy living space for people.

Across three major production bases, energy-saving and low-emission practices are implemented throughout the entire process—from source to innovation—each step reflecting a deep sense of responsibility for the planet's future.

3

major production bases.

## PRODUCTION

Deqing Production Base

Wuhu Production Base

Jiujiang Production Base

### Nautral Material

95% Natural Raw Materials.

### Renewable Energy for production

Solar energy to produce electricity account for 10% overall industrial

### Recycle

100% Raw Material Recycle.  
100% Industrial Water Recycle.

# Limestone

A refined balance between natural limestone texture and contemporary sensibility. Beneath its soft tones lies a quiet structural order, with a fine, sand-like texture that feels warm and understated. Each design is a subtle dialogue between nature's imprint and modern craftsmanship.

# Wood

A poetic preservation of nature's warmth. Each ring and texture is faithfully replicated, as if time slowly grows upon the surface. It merges the softness of wood with the strength of porcelain, creating a profound dialogue between nature and craftsmanship.

# ART

Inspired by the powerful brushstrokes of Cézanne, each block of color embodies the joy of swift, thin-layered application. You can almost feel the lightness and immediacy of his paintings. From the heights of his canvas, gaze upon Mont Sainte-Victoire and the vast countryside—villages, forests, and hills painted in warm yellows and greens under the sun. The strong, defined contours of every scene, the rich layers of color, all serve as the creative foundation for this series.
