NABEL

OUR improvement in 2023

13,500

*Tons of carbon
emissions reduction*

We are NABEL

Explore the strength of the nature and art,
and design for the future!

Let great artists decorate your home.

Nabel derives from Hangzhou, the origin area of the Chinese pottery culture. Established in 1992, it boasts multiple world-leading production lines, with a production scale of 100 million square meters. Nabel exports more than 110 countries and regions. Enjoying worldwide reputation, it aims to become "a globally leading provider of high-end decorative material system".

We not only pursue excellent product quality, but also create a green and healthy living environment for our customers. We attach great importance to green development, energy conservation and emission reduction, and have positively turned from "traditional manufacturing" to "green intelligent manufacturing".

We've constructed the flue gas emission system with ultra-low emissions to achieve low carbon and emission reduction. We've also attained recycle utilization of raw material during production. We keep practicing the idea of sustainable development and create green, digital and smart factories. We target at boosting the industry's green development and leading a healthy lifestyle with high-quality green products. In 2016, Nabel brought in the world first-rate production line of sintered stone, including wide-body kiln imported from Italy. In 2017, the first set of sintered stone in China was born in Nabel, thus creating the era of sintered stone in China. In 2020, Nabel adopted the intelligent full-body 5.0 technology and launched the first set of full-body antibacterial sintered stone. We take inspirations from the nature and adopt the concept of artistic houses to keep expanding the application fields and boundaries of sintered stone, covering wall, floor, countertop and furniture finishes. Nabel committed to create more imaginative aesthetic spaces of sintered stone for our customer.

Nabel has led the industrial development through technical innovation and served as a pronoun of quality, beauty, green and environmental protection. We're willing to share the sintered stone aesthetics with everyone, jointly explore the strength of the nature and art, and provide a more comfortable spatial experience that is closer to the nature for our customers!
