PHUC MY GIA

Phuc My Gia Custom Furniture Co., Ltd. manufactures high-quality furniture, specializing in premium wood and advanced techniques like PET coating. This coating enhances durability, scratch resistance, and aesthetics. We use materials like F-OSB, MDF, and plywood to create modern, functional, and beautifully designed furniture, contributing to enhanced living and working spaces. Our commitment is to provide products that meet high standards of quality and design.

WHAT IS PET?

PET (Polyethylene terephthalate) is a popular synthetic resin used in various applications. As a polyester plastic, it offers transparency, rigidity, durability, and heat resistance. Commonly used for beverage bottles, cosmetic containers, toys, and polyester fibers, PET is also a novel material in interior design. Its safety, odorless nature, and non-toxicity make it highly valued. PET's strength, impact resistance, scratch resistance, water resistance, and moisture resistance are excellent for interior applications. Below is Phuc My Gia's PET color palette.

Glossy PET

02

Glossy PET (Polyethylene Terephthalate) is a premium surface coating widely used in modern interiors. Its luxurious, mirror-like shine creates exceptional light reflection, making spaces feel larger and more sophisticated.

Commonly found on kitchen cabinets, wardrobes, partitions, TV shelves, and desks, glossy PET is ideal for those who appreciate modern, luxurious, and minimalist styles.

02

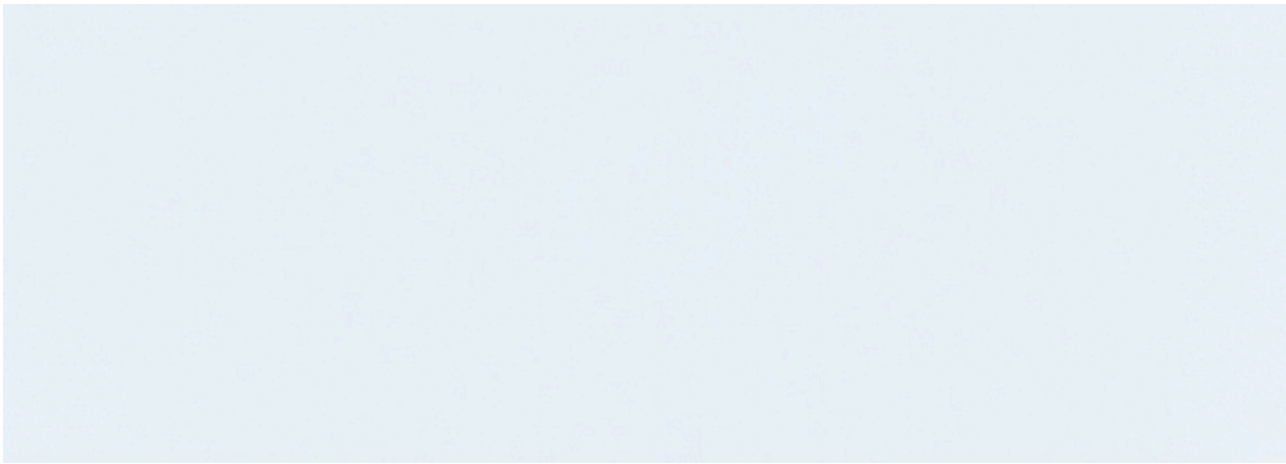

Besides glossy PET, matte PET is the perfect choice for spaces requiring sophistication, softness, and a modern feel. With its luxurious matte surface, this coating offers a soft touch, reduces light reflection, and resists fingerprints, keeping surfaces clean and beautiful.

Matte PET is commonly used in minimalist, Scandinavian, or Japandi interior designs, and is suitable for bedrooms, offices, wardrobes, and built-in cabinets.

03

Metallic PET is a premium surface coating material that combines the superior features of PET coating with a luxurious metallic effect. The surface has a subtle shimmer or brushed texture, creating a modern, sophisticated, and technological look that is well-suited for high-tech, luxury, or industrial interior designs.

Metallic PET is commonly used in products such as kitchen cabinet fronts, wardrobe doors, wall panels, reception desks, and partitions, and is particularly suitable for luxury apartments, showrooms, and modern design offices.
